RealXoin - White Paper

RXE

Have you ever thought of owning some shares of the world's biggest tech companies such as Apple, HP, IBM, Amazon,Microsoft, Google, Intel and others? We can make it happen even just for one share.

RealXoin or RXE can make it happen for the masses as we plan to launch an ICO of our tokens with the funds received for the purpose of investing solely into the biggest tech shares and the most promising start-ups in the real world, thus creating the intrinsic value to back RXE as an asset of the future. However for the moment the Pre ICO and ICO tokens which are for sale cannot be deemed as a security.

The world is rapidly changing, cryptocurrency and blockchain, with the decentralized system is renewing the financial landscapes of communities and nations, opening doors and opportunities.

As for the digital world of RXE we will be developing using Ethereum blockchain to create crypto/digital applications to position ourselves as a Fintech company.

It is like Crypto Valley meeting with Silicon Valley.

The immediate future of RXE blockchain will be for these purpose;

1.   **Smart Investment Contract - SIC**

As we are investing into the biggest tech companies shares, we expect to receive yearly dividends from these companies.

Therefore every holder of a minimum 100 RXE will be eligible to receive returns of our investment of the real world.

Our cut off date will be 30th September of each calender year.

With our methodically designed calculation, we will be giving out these dividends that we received straight into the wallet of every RXE holder who are eligible with our blockchain technology.

2.   Smart Trader Contract - STC

We will launch this product the very moment we are listed in the exchange. The benefit of this app is we are giving the power of trading of all the tech shares that we own to the holder of RXE.

It will be even more exciting as RXE tokens too are traded simultaneously.

RXE can be use to buy and sell and keep, the real world shares of all the tech companies which we have a link and associated with. You can choose to buy and sell the shares any time you like in accordance to our real time telecast in our website and app.

3.   Smart Bond Contract - SBC

It is like buying bonds where you lock your RXE tokens for a certain amount and for a certain period of time where you can enjoy a high yield upon maturity.

This product are for the pure investors who does not trade yet can enjoy the yield upon its appointed time.

We will be offering the investment timeline of 6 months, 12 months and 18 months.

The tentative yield we will be offering in this product will be;

6 months - 7% yield.

12 months - 16% yield.

18 months - 24% yield.

The app is user friendly and you will see the countdown of the contract timeline you choose. The moment it touches zero day, the yield of RXE tokens will be deposited immediately into your wallet.

4. Launch a Cryptocurrency Exchange in Mongolia name Genzhis

To develop a Cryptocurrency Exchange platform of Bitcoin, Ethereum and RXE, with the flexibility of depositing and withdrawing in fiat currency such as USD, MNT, ROUBLE, KRW, RMB, JPY, GBP, EURO, SGD and MYR.

We will have a strong team of customer service and administration base in Ulaan Baator, Mongolia. However the banks for deposit and withdrawal of each fiat currency are situated mostly in their respective countries.

The transaction fee will be low and we intend to give all our customers opportunities from these exchange.

5. Listing in 3 Exchanges

RXE expected to be listed in 4 exchange.

A)   DeltaEther Exchange -   USA

B)   Binance Exchange -   Hong Kong

C)   CoinCheck -   Japan

D)   Genzhis -   Mongolia

ABOUT RXE

RXE Organization Limited is at the forefront of the new digital economy of investment and trade with high transparency standards and the practice of self regulation according to the international standards. We will be inculcating philosophy of Anti-Money Laundering, AML and Know Your Client, KYC culture. Our intention and vision are clear that we aim to be a highly favored token among the masses and the cryptocurrency community.

We will offer our customers with our unique platform and services, adapting our products to all the principles of decentralized system. We will be looking in providing speed and a 24/7 customer service department to handle professionally our customer needs and enquiry.

The financial products of RXE such as SIC, STC and SBC is that the project allows customers to get the services right into the palm of their hands with the freedom of making their own decision.

RXE will be a game changer in the financial landscape as trading in stocks and bonds are no longer for the rich but are for the ordinary people, even those without a credit history, to whom traditional financial institution cannot provide.

With the integration of decentralization, RXE team choose to adopt all the advantages of the conventional financial organizations, yet breaking away from systemic manipulation, central decision, stakeholder fees, lobbyism, administrative burden and high banking charges. It will be the free economy of supply and demand.

The usage of RXE which do not require central control, where the use of our smart contracts allows to process transactions more efficiently and safely. Once you hit the confirm or send button, it is all system go and no turning back. We represents the decentralized system in the most complete format of the blockchain technologies that ensure secure information recording and storage. This will completely cut out the possibility of changing or falsifying any piece of data.

PRICE OFFERING AND MARKET CIRCULATION

RXE is a borderless token that will be powered by the Ethereum blockchain base on the platform of ERC 20. The tokens are limited and pre-mine with an eventual circulation of 300,000,000 RXE to be traded upon ICO at USD 0.30 per token.

Unlike some developers and ICOs that are back by a large financial player, we choose to work the opposite towards a huge public spread. Time and time again we see these large players exit at will and create a market crash.

Our intention are clear where our digital marketing team is intent to sign up ten and tens of thousands of individuals even a wallet with just a minimum purchase of USD 10 of our tokens.

However, there will be a special Pre ICO token sale where the first stage of April and May 2018 to be sold to friends and associates at a very special price.

The month of June, July with the developed RXE digital wallet and web portal, every token will be sold at USD 0.20 per token. A full force of digital marketing and regular press release will be executed up to the time of listing.

The partial month of August, prior to 2 weeks before the listing in an exchange on the 3rd September 2018, RXE token will be sold at USD 0.30 with a 10% discount.

A SIMPLE GUIDE OF OUR ROAD MAP.

April 2018   -

Whitepaper

Videos and presentation materials - various languages
